  - AWS
- Machin Learning

EDUCATION

Python Development in AI
Nackademin

August 2023 - Ongoing

So far I have learned:
- How to write fast and efficient applications in Python
- How to model and create a database
- How frontend and backend work together
- This education also covers AI development, machine learning, deep learning and neural networks.

Frontend / App development
Changemaker Educations

July 2021 - 2023

Dring this education I learned:
- How to work with web application development according to UX, Mobile First, and responsive design
- To create sustainable system solutions, system integrations, and third-party solutions (API)
- Being able to plan and produce web applications and websites based on the customer's needs, operations, and business benefit
- Gained knowledge in UX, design, and layout based on the customer's business and business benefit
- Gained an insight into how to connect business benefits, business logic, needs analysis, and business concepts to technical choices and opportunities

WORK EXPERIENCE

Frontend Developer – Internship

Granditude | January 2023 - April 2023

During my internship at Granditude, I learned how to work agile and refactor code. I also learned how to understand and navigate through a bigger and more complex code/project than I had ever worked on.

Technical support – Part time employment

46elks | March 2022 - October 2022

My main tasks were to call and welcome new customers and receive support calls and emails where I mostly answered questions about the company's API, and I also solved problems that customers encountered with the API. During this time I developed my ability to solve various problems with creative solutions.

Frontend Developer – Internship

46elks | March 2022 - August 2022

During the six months I interned at 46elks, my main task was to design their new internal platform. The platform would be used to preserve job-related documents and information.
During my internship, I practiced my problem-solving and my ability to search for different answers and solutions to my problems.
